

IEEE Space Hardware and Radio Conference (SHaRC 2020)

26-29 January 2020, San Antonio, TX, USA
Grand Hyatt San Antonio

IEEE SHaRC

IEEE

Paper Deadline
24 July 2019

Steering Committee

General Chair

Robert Caverly, *Villanova University*

General Co-Chair

Nuno Borges Carvalho, *Universidade de Aveiro*

Technical Program Chair

Kevin Chuang, *NanoSemi, Inc.*

Finance Chair

Alexander Koelplin, *University of Erlangen-Nuremberg.*

PAWR Co-Chairs

Pere Gilibert, *University Politecnica de Catalunya*
Christian Fager, *Chalmers University*

WiSNet Co-Chairs

Luca Roselli, *Univ. of Perugia*
Rahul Khanna, *Intel*

SiRF General Chair

Ahmet Cagri Ulusoy, *Michigan State University*

SHaRC Co-Chairs

Holger Maune, *Technical University of Darmstadt*
Charlie Jackson, *Northrop Grumman*

Executive Committee Chair

Dietmar Kissinger, *IHP Microelectronics*

Conference Management

Elsie Vega, *IEEE*
Deidre Artis, *IEEE*

Call For Papers

The 2020 IEEE Space Hardware and Radio Conference (SHaRC 2020) will be a part of 2020 IEEE Radio and Wireless Week (RWW2020) which will be held the week of 26 January 2020 in San Antonio, TX, USA.

RWW2020 will also feature:

- IEEE Radio and Wireless Symposium (RWS)
- 20th Topical Meeting on Silicon Monolithic Integrated Circuits in RF Systems (SiRF)
- IEEE Topical Conference on Wireless Sensors and Sensor Networks (WiSNet)
- IEEE Topical Conference on RF/Microwave Power Amplifiers for Radio and Wireless Applications (PAWR)
- Focus sessions on 5G and MM-Wave to THz Technologies and Applications

Each of these events will be organized separately, with their own call for papers found at <http://www.radiowirelessweek.org/>.

The IEEE Space Hardware and Radio Conference (IEEE SHaRC) addresses new concepts, novel implementations as well as emerging applications for space-based hardware for communications, earth observation, and other novel disruptive services. To meet recent needs, there has been a renaissance of interest and investment in space- and suborbital-based systems especially for high-data-rate communications networks. These new global satellite networks are disruptive, and many applications are feasible: e.g. the creation of a worldwide car-to-car communications network or global sensor & control systems for autonomous vehicles. The IEEE Space Hardware and Radio Conference provides a forum for discussions on this new frontier.

Papers featuring innovative work are solicited in (but not limited to) the following areas of the space hardware and systems:

- Manufacture and Deployment of Large LEO Satellite Constellations (1000 to 4000 Satellites)
- Lower-Cost Alternatives
- Unmanned Air Systems
- Terrestrial Systems
- Cubesat Hardware and Systems
- Satellite and Balloon Concepts
- Small and Micro-Satellite Design
- Orbital Configurations & Operations
- Radiation Effects
- Phased Arrays
- High Data Rate Links
- Geolocation
- Earth Observation
- Frequency Spectrum Allocations
- International Regulations & Standards
- SIGHT Applications of the IoS

SHaRC 2020 Co-Chairs

Holger Maune, *Technical University of Darmstadt*
Charlie Jackson, *Northrop Grumman*

Paper submission instructions can be found at <http://www.radiowirelessweek.org/>. Submissions should be formatted according to the submission review template available on the RWW website. Authors should indicate preference for oral or poster presentation. All submissions must be received by **24 July 2019**. All accepted papers will be published in a digest and included in the IEEE Xplore® Digital Library. Submissions will be evaluated based on novelty, significance of the work, technical content, interest to the audience, and presentation.
